

Joint Recommendation regarding Fisheries Conservation Measures under Article 11 of Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy (the Basic Regulation) for the Marine Protected Area Bratten, located in the Skagerrak.

A copy of the proposal for fisheries conservation measures in waters under the sovereignty or jurisdiction of Sweden in the marine protected area Bratten in the Skagerrak is given in Annex I.

Sweden, as the initiating Member State, jointly recommend together with Denmark and Germany the proposed fisheries conservation measures, as described in detail in Annex I, to the Commission for adoption as a delegated regulation.

The Swedish proposal for fisheries conservation measures for the marine protected area Bratten has been coordinated with representatives from environmental and fisheries departments in Denmark and Germany and the North Sea Advisory Council. Sweden, Denmark and Germany have respectively consulted their fishermen associations/organizations. Sweden and Denmark have consulted NGOs as well.

Denmark and Germany have a direct management interest in the fishery to be affected by these measures. In accordance with Article 11(3) of Regulation (EU) No 1380/2013, Sweden provided Denmark and Germany with relevant information regarding the proposed fisheries conservation measures, including their rationale, scientific evidence in support and details on their practical implementation and enforcement.

After several consultations there is a common understanding and agreement among Sweden, Denmark and Germany to the proposed fisheries conservation measures, which are described in section 2 "Recommendations to be implemented in relation to fisheries conservation measures". The international and national consultations held and outcome thereof is given in Annex 1, appendix 9.

The overall aim of the proposed fisheries conservation measures is to ensure adequate protection of bottom habitats with high conservation values in order to contribute to coherent and representative networks of marine protected areas in waters under the sovereignty or jurisdiction of Sweden in the marine protected area Bratten in the Skagerrak. Thereby the proposed measures contribute to the obligation of achieving favourable conservation status under the Habitats Directive Article 6 as well as the obligation to achieve or maintain a good environmental status in marine waters by 2020 according to the Marine Strategy Framework Directive. The proposed fisheries conservation measures are proportional with respect to the Habitats Directive and the Marine Strategy Framework Directive and are applied in a non-discriminative manner due to close coordination with Member States having a direct management interest in the concerned sites (DK and DE) as described in Article 11 and 18 of the Basic Regulation.

1. The Marine Protected Area Bratten

The present joint recommendation entails fisheries conservation measures in the marine protected area Bratten located in the Skagerrak, in the Swedish EEZ, which has been designated as a Natura 2000 site as well as an OSPAR MPA. Sweden has therefore decided to incorporate, where necessary, the recommendations to protect the designated OSPAR habitats and species accepted under the OSPAR convention in the proposed measures in order to establish an ecologically representative network of marine protected areas in accordance with the Marine Strategy Framework Directive.

- (1) Sweden considers that, for the purpose of complying with Article 6 of Directive 92/43/EEC and Article 13.4 of Directive 2008/56/EC, fisheries conservation measures need to be adopted in certain areas under its sovereignty in the Skagerrak. If necessary conservation measures affect the fishery of other Member States, the Member States may submit these measures in joint recommendations to the Commission.
- (2) The recommended fisheries conservation measures concern parts of the marine protected area Bratten in the Skagerrak. They comprise the prohibition of fishing activities of commercial fishing vessels in areas hosting bottom habitats with high conservation values. These areas are laid out as no-take zones.
- (3) Fishing activity with mobile bottom contacting gear has a negative impact on bottom reef habitats with high conservation values, as such activity affects both the reef structures, soft bottoms and the biodiversity found in such areas. Accordingly, the prohibition of fishing activities in the no-take zones, as set out in the joint recommendation, should be included.

Joint Recommendation Marine Protected Area Bratten

(4) To ensure adequate protection of the no-take zones and enable more accurate control and enforcement, all fishing vessels inside the marine protected area Bratten should be fitted with and maintain in operation AIS transponders, class A. The AIS should transmit the position of the fishing vessel every 30 seconds.

2. Recommendations to be implemented in relation to fisheries conservation measures

The following recommendations are proposed to be adopted:

1. It shall be prohibited to carry out any fishing activity in the established no-take zones.
2. Fishing vessels may transit across no-take zones, provided that any gear carried on board be lashed and stowed in accordance with the conditions laid down in Article 47 of (EC) No 1224/2009.

'No-take zones' mean the geographical areas enclosed by sequentially joining with rhumb lines the positions listed in section 6. These zones are areas where no commercial fishing is allowed.

3. Control and enforcement measures to be implemented

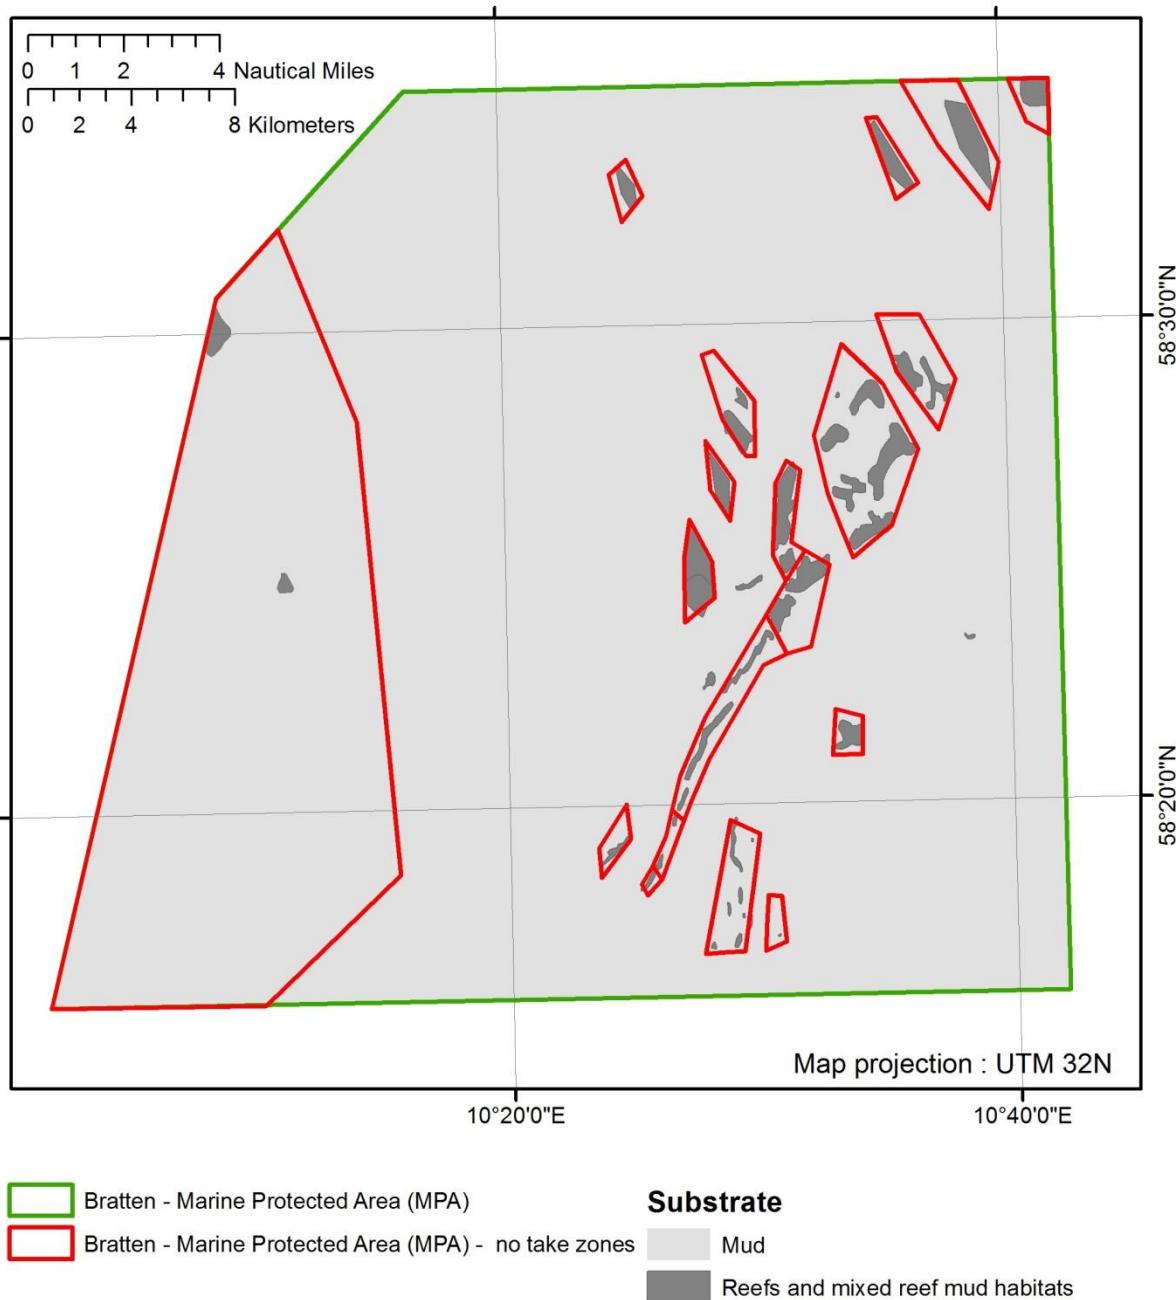

The following control measure is proposed to be adopted:

1. All fishing vessels shall inside the marine protected area Bratten, be fitted with and maintain in operation an automatic identification system, AIS, which meets the performance standards in Article 10.1 of (EC) No 1224/2009. The AIS shall transmit the fishing vessels' position every 30 seconds.

4. Outline and coordinates of the marine protected area Bratten in which fisheries conservation measures are proposed
